PROFESSIONAL SUMMARY

DevOps and platform engineer with 5+ years architecting, automating, and deploying cloud systems on AWS, Azure, and GCP. Proven across enterprise teams (MTN South Africa, Standard Bank) and fast-moving startups, with strengths in CI/CD, infrastructure as code, containers, and reliability engineering. Currently pursuing an MASc in Computer Engineering at Memorial University of Newfoundland. Experienced with data tooling (Azure Data Factory, Microsoft Fabric, Synapse Analytics) and strong in communication, collaboration, and problem-solving across distributed teams.

PERSONAL DETAILS

Nationality: Nigerian

Location: Canada

Languages: English (fluent)

TECHNICAL SKILLS

Cloud: Azure, AWS, GCP, Linode, vSphere

IaC & Config: Terraform, Pulumi, AWS CDK, CloudFormation, Ansible

CI/CD: GitHub Actions, Azure DevOps, Jenkins, CircleCI, Octopus Deploy

Containers: Docker, Kubernetes, OpenShift, Podman, Rancher

Observability: Prometheus, Grafana, Nagios, Azure Insights, CloudWatch

Languages: Python, Bash, PowerShell, Java, PHP

Databases: PostgreSQL, MySQL, MongoDB, Cosmos DB, DynamoDB

Tools & Other: JIRA, Trello, Azure Boards, Technical writing, Software engineering, Windows / macOS / Linux

EXPERIENCE

DevOps Engineer

Jan 2024 – Jun 2025

Inhlelo Consultants · MTN South Africa (via iOCO)

- Worked with the iOCO client team to build and run the MTN SA NextGen App and served as an on-call DevOps support engineer.
- Developed and implemented automated tools and processes for the deployment and maintenance of systems.
- Improved backend API CI/CD pipeline readability and the development team git flow.
- Improved the frontend CI/CD pipeline, cutting deployment time by 20%, and deployed Application Insights for the dev team.
- Rearchitected the cloud deployment design to include configuration management and infrastructure monitoring.

DevOps Engineer

Aug 2023 – Dec 2023

Inhlelo Consultants · Standard Bank (via iOCO)

- Worked with the iOCO client team to build bespoke applications for Standard Bank.
- Built, deployed, and managed team infrastructure on AWS using the Java CDK.
- Set up and managed AWS CloudSearch for the UI team and deployed the Angular UI pipeline.
- Wrote and deployed AWS Lambda functions for event-based applications.
- Deployed and managed CodePipeline, CodeBuild, and CodeCommit using the AWS CDK.

DevOps Engineer

May 2023 – Sept 2023

Lecturio

- Developed and implemented automated tools and processes for the deployment and maintenance of systems.
- Monitored and troubleshooted systems to ensure reliability, scalability, and security.
- Co-created system-behavior requirements and CI/CD strategies for disaggregated technology.
- Created and maintained CI/CD pipelines for system testing and defined alerting via product instrumentation.

DevOps / Site Reliability Engineer

May 2022 – Apr 2023

Occasio LLC

- Served as primary on-call engineer, ensuring system reliability.

- Implemented disaster recovery and optimized database performance.
- Set up monitoring, logging, and alerting on Azure and automated application scaling.
- Managed infrastructure with Terraform workspaces and Azure Key Vault for secrets.
- Developed Azure DevOps pipelines for multi-subscription resource management.

DevOps Engineer

Nov 2021 – Apr 2022

phpsandbox.io

- Managed enterprise CEPH storage clusters and configured SSL for AWS EC2, databases, and the CEPH cluster.
- Reduced CI/CD build time from 45 minutes to 11 minutes and set up CI/CD for the Composer UI application.
- Monitored builds and deployments with Sentry and New Relic and helped the development team troubleshoot problems.

DevOps Engineer

Aug 2021 – Nov 2021

HNG

- Collaborated with the software development team to build the Zuri Chat web app.
- Designed, built, and managed an ELK (Elasticsearch, Logstash, Kibana) stack for centralized logging across React, Vue, .NET, Go, Django, and PHP applications.
- Set up CI/CD pipelines and configured Nagios for real-time server monitoring, ensuring availability and uptime.

Mentee, Polycephaly

Jun 2021 – Jul 2021

Open Mainframe Project (Linux Foundation)

- Monitored the Polycephaly application on z/OS and contributed to its CI/CD pipeline to ensure maximum uptime.
- Set up incident-management and root-cause-analysis tooling and produced technical documentation.

SELECTED PROJECTS

Predictive Maintenance with Edge ML on NuttX

ENGI 9875, 2026

Deployed an INT8 TensorFlow Lite Micro model on the NuttX RTOS (STM32F407, Renode) as a three-task real-time pipeline with rate-monotonic scheduling, POSIX message queues, and semaphores; reached 100% classification accuracy.

Self-Healing Free-Tier Cloud Platform

2026

Terraform on Oracle Cloud with free-tier guardrails, a GitHub Actions retry workflow that cycles availability domains, and a self-updating public status page with graceful degradation.

EDUCATION

MASc, Computer Engineering Memorial University of Newfoundland, Canada

2025 – Present

B.Eng., Computer Engineering University of Uyo, Nigeria

2015 – 2021

HND, Computer Science Akwa Ibom State Polytechnic, Nigeria

2016 – 2018

ND, Computer Science Akanu Ibiam Federal Polytechnic, Nigeria

2012 – 2015

CERTIFICATIONS

- Azure Solutions Architect Expert (AZ-305), Microsoft, 2024
- Azure Developer Associate (AZ-204), Microsoft, 2024
- AWS Cloud Practitioner, Amazon Web Services, 2024
- Certified Kubernetes Application Developer (CKAD), Linux Foundation, 2022
- Azure Fundamentals (AZ-900), Microsoft, 2022
- IT Automation with Python, Google / Coursera, 2022
- Azure Data Fundamentals (DP-900), Microsoft, 2021

SOFT SKILLS

Communication, Teamwork, Problem-solving, Time management, Critical thinking, Multitasking
